

4 50L GAS BOTTLES SLINGABLE CAGE

Technical qualities:

The Slingable Cage was developed in collaboration with waterproofing specialists, to improve the storage and handling of gas bottles, both in the workshop and on site.

Its mechano-welded steel structure, extremely robust, is equipped with a flat support surface with no salient angles, so as not to damage the floor, including the waterproofing membranes on the roof terrace.

Its hot galvanization treatment guarantees you a very good durability, even when used outdoors.

The bottles are loaded and unloaded on one side, after opening the door to a flap. A central locking device, in the centre of the cage that opens in the same direction as the door, keeps the bottles in position inside the cage, allowing for partial loading.

To facilitate the loading of the bottles, the drop-off area has been lowered to the maximum, in order to limit the carrying of load.

The cage has a sling point and can also be moved with a forklift. In this case, the forks of the forklift are positioned at the top of the cage, avoiding any accidental tipping.

Ref. 300 854

The 4 Bottles Slingable Cage is the ideal solution to store and move your bottles safely in the workshop and on site.

Characteristics:

- Hot galvanized steel structure (according to ISO 1461)
- Clutter (L x W x H): 640 x 675 x 2015 mm
- Ground support surface (L x W): 640 x 610 mm
- Extra-flat loading height: 50 mm
- Maximum bottle diameter: 250 mm
- Empty basket weight: 92 kg
- Maximum usage load: 300 kg
4 50 liters bottles weighing 75 kg each
- Total weight allowed in charge: 392 kg

- Suitable for 50 liters gas bottles
- Capacity: up to 4 gas bottles
- Sustainable construction of hot galvanized steel
- Transportable to forklift and slingable
- Devices to hold bottles directly integrated into the structure and allowing the cage to be slung even in the case of a partial load
- Door equipped with a robust closure system and a safety padlock

Applications:

- Secures handling operations
- Makes it easier to store bottles
- Fight against the theft of bottles on site...

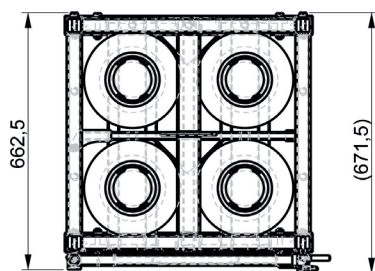

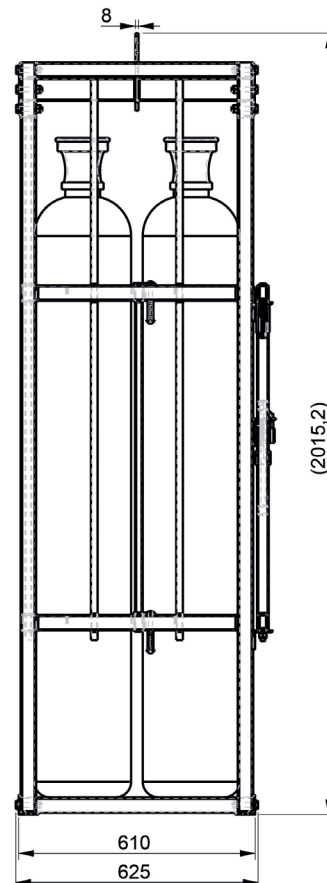

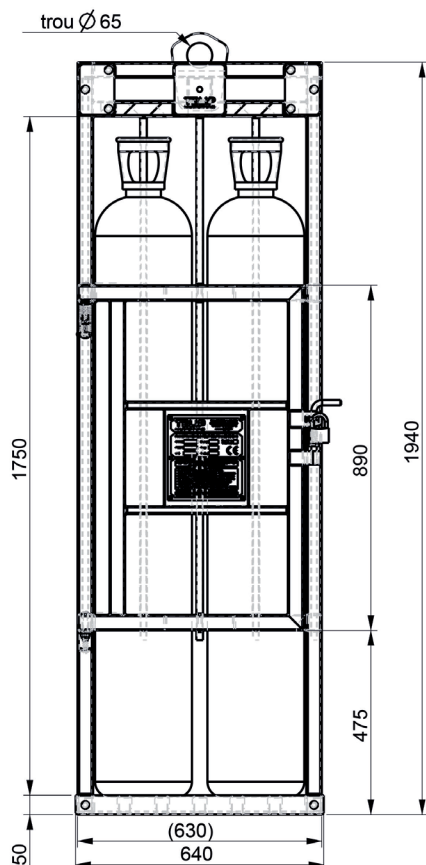

Device developed in collaboration with the French Trade Union Chamber of Waterproofing

In compliance with the machine Directive 2006/42/CE
